## About This Game

Space - The Return Of The Pixelfrazer is an open-world sci-fi hack'n'slash.

Your aim is to explore the inexhaustible amounts of destructible asteroid fields, spacestations and unknown planets of the universe.

And by exploring I mean hacking, slashing and destroying everything that comes into your way.

Shredding all kind of objects means getting more resources and getting more resources means upgrading your ship so you can shred more kind of objects, which rapidly becomes an addicting spiral.

And maybe, one day you'll probably find out about one of the most unsolved mystery of our universe... the pixelfrazer.

Be excited of all the cool features this game brings to you:

- all sorts of combinable weapon upgrades and active abilities
  - procedurally generated infinite world
    - quests
    - cool physics
  - randomly generated music
- local co-op (Xbox360 controller required)
  - and a lot of love

Not only is Space completely designed, created and programmed by one person, the whole gameengine is build up by this guy and this grants you an unique experience of a game the couldn't be any more indie.

This is hilarious.

It is an on rails shooter that with some "amazing" voice acting.

The game is seriously fun to play for a while. Not sure if it is still good on hour 2 though.

<https://youtu.be/VKqIO7Br1siM>. that was, quite possibly, the worse game i've ever played.. Great potential, but it fell short and was way to fast for 19.99. never again. how do i activate the dlc?

. This Game is very fun and interesting. But the game devs and the streamers of this game are to most power abusive and ignorant i've ever seen. If you are playing the game and a dev or a streamer gets don't go anywhere near them or just straight up logoff. i like this game a lot but the abuse of these groups ruin it for several people.. You will need to cap the game at 60 fps and run it in compatibility mode for Windows Vista if you want a smooth experience. Besides that the game is fantastic and worth the money.

---

A fun little retro SRPG. There are a lot of different builds and party formations to try.

The UI takes a little getting used to (should be improved in next patch) but in general it is fun.

Could be a bit longer? Looks like I beat the game in 8 hours. But the game is priced accordingly.. Wish there was a neutral button here. If you really love The Munsters this could be good for you. Otherwise, stay away. Just don't expect too much.. Last Dream is a really cool old-school rpg that you have so much choice and control over your own experience of the game. When you start a new game you choose your party of four (out of 8 characters), the difficulty, enemy encounter rate, and when and where you can save. From what I've played so far it has item crafting, good dungeons, annoying puzzles (by that I mean they're good), tonnes of loot, decent exploration and an interesting story. If your looking for an old-school rpg to play you should get it I can't recommend it enough.. Simple game with simple controls suitable for kids. You can reverse gravity to get you through 40 simple puzzles in less than 30mins then idle the game for the trading cards/ keep playing to complete achievements. Only worth it if you grab it on sale or in a bundle. A couple of speed run levels made the game more interesting for a minute or two.. freakin phenominal the games horde mode is crazy as all hell the story modes puzzles, puzzle me lol, see what i did there lol ummm get the game its definitely worth it i cant wait for updates like more games and everything like that , gamne of the year yall.. I highly recommend this game if you like puzzle games.

-Has many many levels.

-The levels are not too hard and too easy, they are just the right amount of difficulty.

-Every level has two bonus challenges for those looking for added difficulty.

-Many types of blocks that gets you to think differently for each new level.

I can see that the developers really put their hearts into making this game, and even though I've only played 4 hours I already know it was worth the money spent.. Can't play the game at all on my windows 8.1 pc.. Other than the backkwards cab view every time I try to shunt the transport cars they derail. not matter the speed or antything i do they derail every single time
